

# HIGH PLAINS POWER CURRENT

Let us Help you Stake out your Future

## STAKING AND CONSTRUCTION

While we do new construction all year long, late spring through fall are our busiest seasons. We have new construction (residential, commercial and irrigation), and service upgrades going on.

The first step toward a new build is picking up a new service application. There is a \$100 staking fee that goes toward the cost of the build. It is a down payment on the new construction. Once the application is submitted and the staking fee paid, the new service will go on the schedule for the engineers to come out and stake out your new build.

The stakers provide an estimate on what the build will cost and give the member their portion of the construction cost.

Once the upfront has been paid, the job goes on the schedule for the crews to build. Usually from the time a job goes into the queue to the job being built can be anywhere from two to four weeks.

Keep the checklist that you were given when you filled out your initial application. It is helpful as you work your way through the process.

### Things to note:

You may need to apply for a state electrical permit. Your electrician will usually handle that for you, but make sure that you communicate with them about it, if one is required. It is an online application process through the state.

Right of way. There may be additional paperwork that needs to be signed for the right of way for your build.

Paperwork can be signed and mailed in, or you can come to our office and sign. We have notaries available.

Contract paperwork will arrive in two sets. The paperwork is identical. Once complete, both HPP and the customer will have an original copy for their records.

Once paperwork is signed and your contribution is paid, your build goes into the queue for the crews to work on.

Have any questions about this process? Please let us know!

### NOT YOUR MAMA'S BANANA PUDDING

## Recipe

2 bags Pepperidge Farm Chessman cookies

6-8 bananas 1 (5oz) pkg instant vanilla pudding

2 cups milk 8oz cream cheese softened

1 can sweetened condensed milk 12oz Cool Whip

Line 9x13" pan with cookies, place sliced bananas

over cookies. Mix pudding with the milk. Beat the

cream cheese, add to pudding, then mix in the

condensed milk. Fold in Cool Whip, spread pudding

over bananas. Put more cookies over the top and

refrigerate. Enjoy!

## THINGS TO THINK ABOUT FOR A NEW SERVICE

In our last edition, we talked about how landscaping can effect safety and about the Call Before You Dig program. When you get ready to do a new build, consider some of these suggestions. As you plan your landscaping and home layout, think about whether your electric infrastructure is going to be overhead, or underground. Think about where those lines will go and how you want your landscape to look. Don't plant trees where the roots will interfere with the lines overhead or underground. Don't run the lines under a place where you want to build a patio. If you think you might add buildings later, think about where those will go in relation to the lines you are putting in now. **Plan for the future!**
